Your business in safe hands

Customer service is paramount to us – as is health and safety compliance. To this end, we provide quality assurance for our clients in everything we do.

50 Years of engineering excellence

Hallamshire Engineering provides specialised design, manufacture, maintenance and project works services to public and private sector clients.

Passionate about our customers

Our mission is to offer a safe, quality controlled, cost effective and dedicated engineering service tailored to specific client requirements.

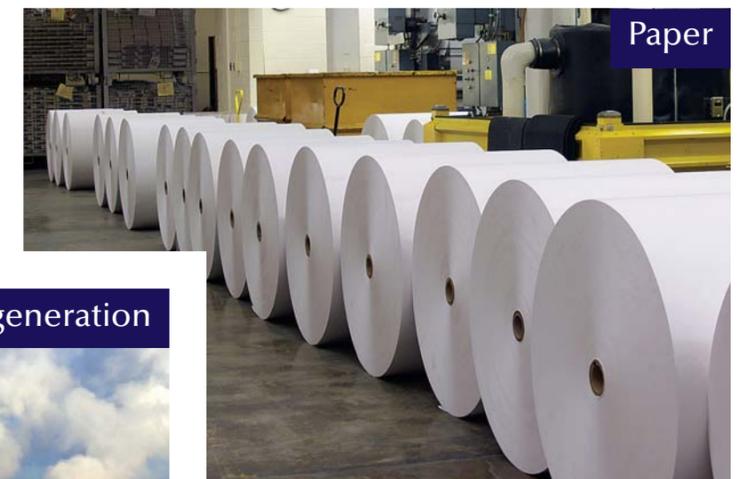

We believe that customer needs are paramount and constantly strive to form strong, yet flexible relationships with our clients that are built up around the business demands inherent to that particular industry.

Our specialist services can be individually specified, ranging from the provision of labour only and free issue material through to complete project management.

Our services cover the following industries:

Gas and oil

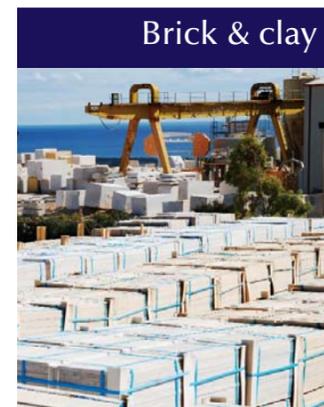

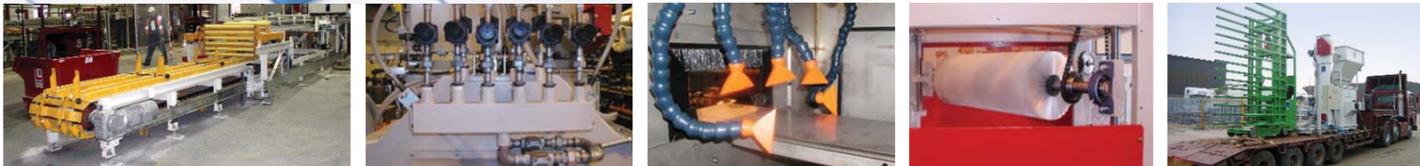

Paper

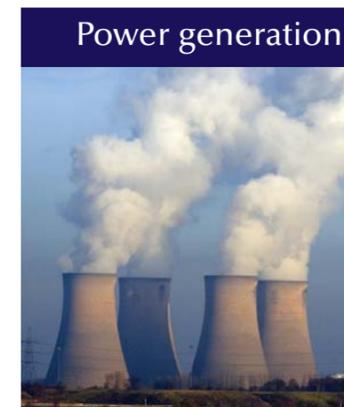

Technical competence

This degree of experience, combined with impressive levels of competence, flexibility and technical innovation, has enabled the company to provide a completely integrated range of products and services to exactly match the requirements of the customer – Regardless of the size, location or complexity of the project.

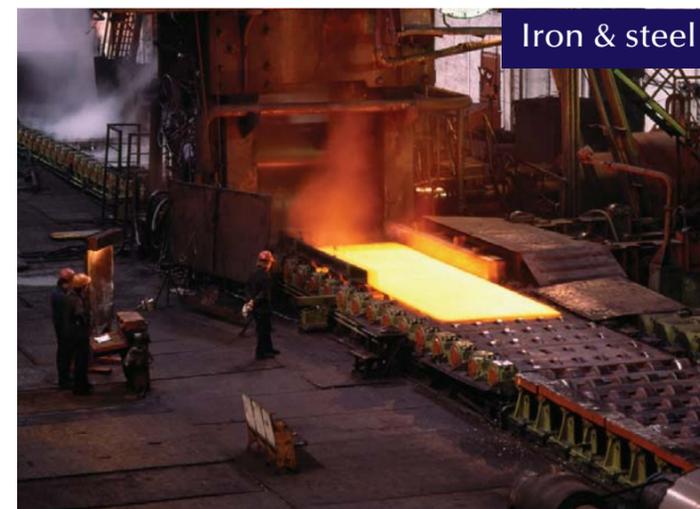

Brick & clay

Power generation

Mining

Iron & steel

Hallamshire Engineering is experienced and has an impressive track record in delivering complex solutions. These key drivers have been fundamental for the growth of our reputation and client base.
